Level 0 | Laboratories, foyer and workshop frontage

Coordinated current design: foyer entrance, laboratories, circulation and partial workshop context

Current layout

36 benches, four places each: 144 illustrative places across the three labs. In G.04, south-wall low storage is removed, two tables meet the wall, and a matching table sits southeast of the east column.

Entrance and lift lobby

Double glass doors occupy the full-width opening at the west end of the north hallway and open outward into the main foyer. Both lift-lobby doors are matching single glass leaves opening into the lobby. PB marks push-button operation. The solid south-hall door and six lobby display cabinets are retained.

Teaching and storage

G.04 has two displays on the west wall and a third centred on the east wall, all facing into the lab. Dark-blue bars and arrows show screens and viewing direction; symbols are offset for clarity. Blue SINK basins and purple DEMONSTRATOR stations are distinct. The G.04 station sits west of the western column.

Drawing key

- Experiment bench / equipment
- Storage / cabinetry
- SINK / basin
- DEMONSTRATOR STATION
- Illustrative occupied space
- Structural column
- DISPLAY / arrow faces into room
- Full-height glazing
- Overhead / high-level element

Drawing basis

The ground-floor model registers an existing map to the earlier lab drawings. The 1:160 plot preserves those model proportions; dimensions are not a measured survey. The foyer, toilets and west stairs follow the newer walkthrough. Grey workshop frontage follows the combined-workshop reference; its stepped north edge is registered to the lift and laboratory corners.

Bench modules

West and south labs: approximately 1.969 x 0.984 m. East lab: approximately 0.983 x 1.966 m or 1.966 x 0.983 m, following its separate source-plan scaling. Four stools per bench; occupied clearances require review.
