Level 1 | Shared-wall options

1.22 / 1.23 partition: plan relationship and interior elevations

A / Clear glass + full-height curtain

B / Smart glass

C / Solid wall + whiteboards

Plan relationship

The options occupy the same shared-wall line. The permanent 1.47 m whiteboard bay lies directly south of the 1.800 m double doors. It remains on both faces to the 2.20 m door head in every option. Clear glazing remains above that bay in the glazed options.

Clear-glass option / walkthrough default

Clear bays run from floor to the 3.00 m ceiling, with no solid plinth. The full-height curtain runs along the clear bays and stops before the permanent board. Curtain shown stacked at the end; track shown dashed.

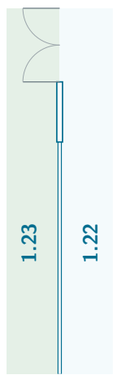

Smart-glass option

Only the next two bays south of the permanent board switch: 2.80 m nominal width, from 1.00 m handle height to the 2.20 m door head. All surrounding glazing remains clear. This model option retains a 240 mm base plinth.

Solid-wall option

Full-height solid partition with a 5.45 m-long whiteboard on each face, plus the permanent board bay beside the door. The three options are alternatives; the drawing does not combine their construction.

Shared-wall plan strip / 1:150

Reading these elevations

Horizontal direction is from the south end of the wall (left) toward the connecting doors (right). Heights and bay divisions follow the model; frame and board mechanisms remain conceptual.
